Microsoft 365 Education

June 2021

m365maps.com

Microsoft 365 Education Benefits

- Office Servers** Install SharePoint, Exchange, and Skype for Business Server on dedicated hardware (not multitenant), for use by Microsoft 365 A3 & A5 licensed users. Excludes CSP/MCA.
- Students Use Benefits** Many components of Microsoft 365 Education, when purchased for SaaS, provide benefits for Students. Refer to the Product Terms for the latest Student Use Benefits.
- FastTrack** FastTrack helps customers deploy Microsoft 365. Customers with 150+ eligible licenses can use FastTrack at no additional cost for the life of their subscription.
- Microsoft Education Edition** A game-based learning platform that promotes creativity, collaboration, and problem-solving. Included with Microsoft 365 A3 and A5.

Microsoft Viva

- Viva Connections** Teams embedded intelligent content experiences.
- Viva Insights** Employee productivity & wellbeing insights.
- Viva Learning** Complete learning management platform in Teams.
- Viva Topics** Integrated knowledge & experts discovery.

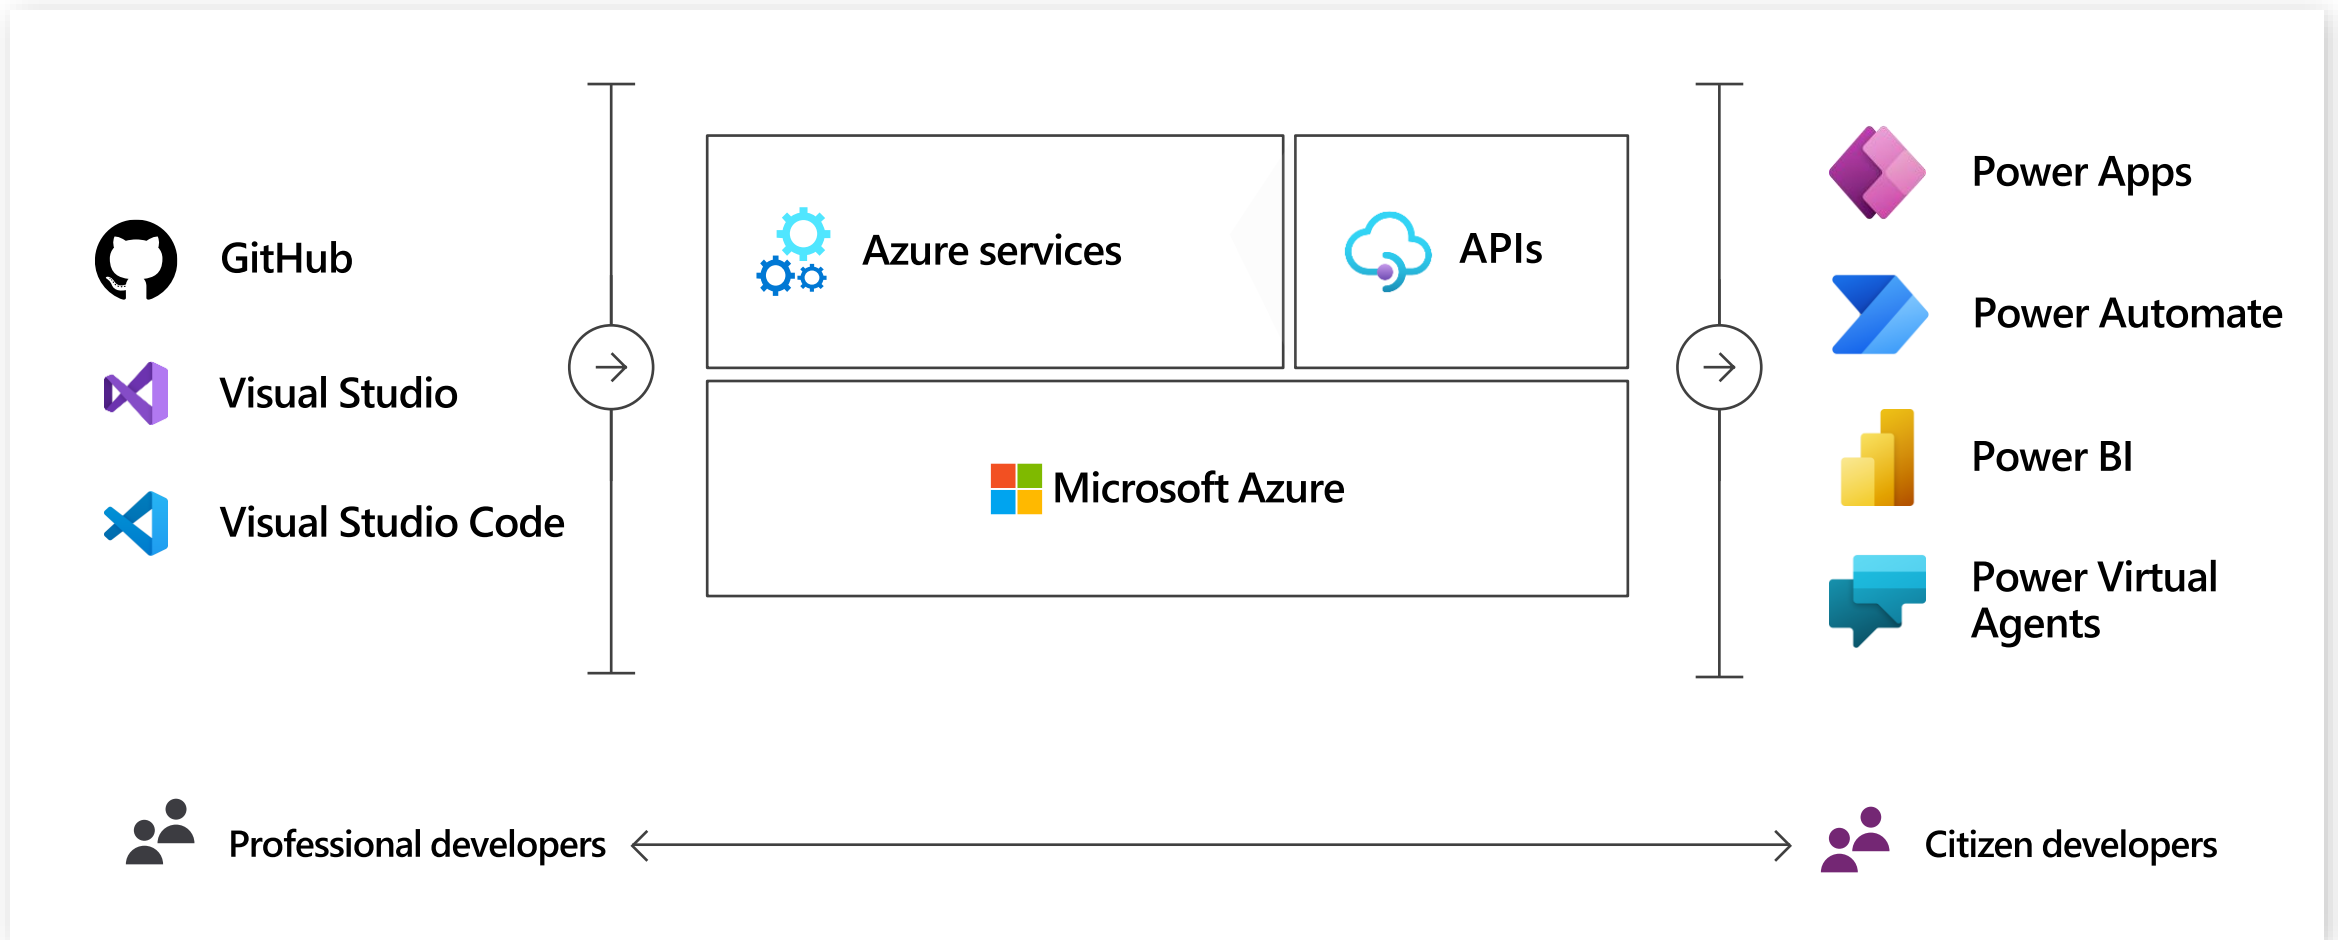

Related Services

- Additional Storage** Additional storage for Office 365.
- AI Builder Capacity** Extra capacity for AI Builder.
- Assessment** On-prem, multi-cloud, and SaaS data governance.
- Call Center** PSTN telephony calling plans.
- Defender for Endpoint (Server)** Defender for Endpoint Server (Windows / Linux).
- Extra Graph Capacity** Additional capacity for Microsoft Search and Graph.
- Microsoft Dynamics** Services for low-code application development.
- Multi-Geo** Split a tenancy over multiple geographies.
- Power Automate** Advanced process automation features.
- Power Virtual Agents** Intelligent agents and bots.
- Scheduler** Schedule meetings with the help of Copilot.
- Teams Gateway Connect** Teams PSTN connection hosted on-premise.
- Viva Outbox** Microsoft Viva.
- 10-Year Audit Log Retention** Built-in long-term storage of audit logging data.
- Advanced Connect** Branding, monitoring, and meetings analysis.
- Assess Dev Tools for Teaching** Software dev tools for teachers and students.
- Assess Sentinel** AI-enhanced cloud-native SIEM.
- Career Coach** Connects students with career path aligned learning.
- Dynamics 365 Customer Voice** More sophisticated surveys and customer feedback.
- Imagix Academy** Skills program benefit for Education customers.
- Microsoft Managed Desktop** Microsoft device management and monitoring.
- Power BI Premium** More capacity and scale for business intelligence.
- Project Online** Microsoft Project.
- SharePoint Syntex** AI knowledge extraction and analysis.
- Teams Rooms** Enable meeting room devices.
- Workplace Analytics** Analyze workplace trends and efficiencies.

Data Warehouse

Michal Princ

Proč BI na univerzitách?

- Podpora pro strategické a finanční řízení univerzity
- Podklady pro hodnocení kvality
- Automatizace a urychlení opakujících se činností v různých oblastech vykazování
- Podpora vybraných rozhodnutí
- Umožňuje srovnání s ostatními univerzitami, včetně zahraničních

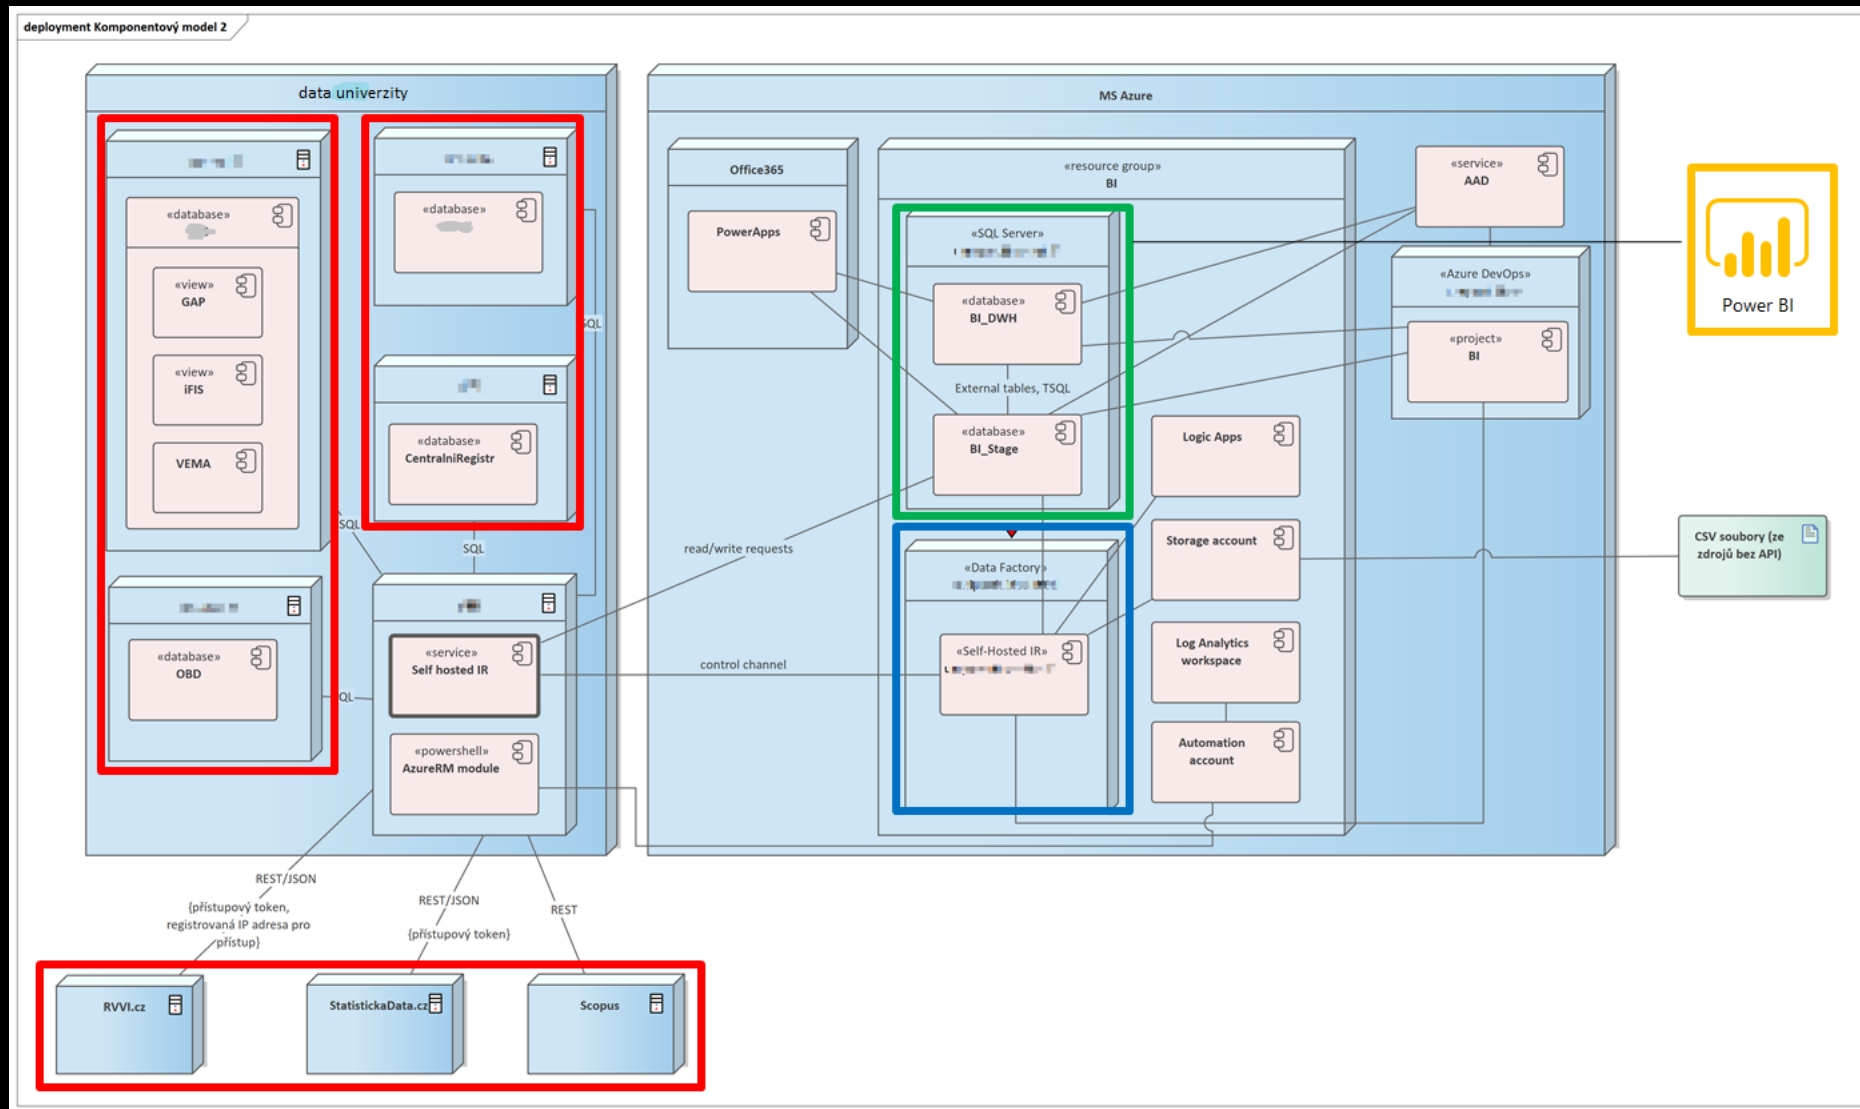

Proč datový sklad?

- Konsolidovaná očištěná data z různých interních provozních systémů + externí data
- Ucelený pohled na problematiku
- Jeden zdroj pravdy pro reporty
- Datová historie umožňuje zpětné pohledy i predikce do budoucnosti
- Lze budovat a rozšiřovat postupně, jak na straně vstupních systémů, tak na straně výstupních reportů či aplikací využívající data

Možnosti datové platformy v Azure

Architektura řešení datového skladu a BI

Datové zdroje (interní a externí)

Načítání a transformace dat (ETL)

Uložení dat do datového skladu

Prezence a sdílení výsledných reportů + self-service BI služba

Měsíční náklady
na provoz datového skladu v cloudu?

300€-500€

v závislosti na potřebách, množství dat, použité technologii atd.

Proč použít cloud (Azure) pro datový sklad a BI?

- Hotové služby – snazší nasazení a méně práce s jejich správou
- Nákladově dostupné – platíte pouze za to, co skutečně používáte + optimalizace
- Flexibilita – vytvoříte, posílíte, utlumíte a vypnete zdroje podle potřeb
- Inovace – neustále aktuální a nové služby
- Přístup odkudkoliv, možnost sdílení
- Vysoká bezpečnost, ochrana dat a soulad s předpisy
- Integrace s ostatními Microsoft službami, např. Microsoft 365, Dynamics 365 atd.
- Vysoká dostupnost, SLA
- Silná podpora hybridních scénářů
- Ověřené řešení na českých univerzitách
- Nasazeno na Žilinské univerzitě v Žilině 😊

Potřeby

Univerzity potřebují být schopny si odpovědět na následující klíčové otázky:

- Jak můžeme měřit výkon/kvalitu ve vztahu ke strategickým plánům univerzity?
(Dlouhodobé záměry)
- Jak zjistíme, zda dosahujeme (či nikoliv) nastavených cílů?
(BI & reporting)
- Jak můžeme demonstrovat zlepšení?
(BI & reporting, Výroční zprávy)

Datové sklady a reporting na univerzitách

Běží:

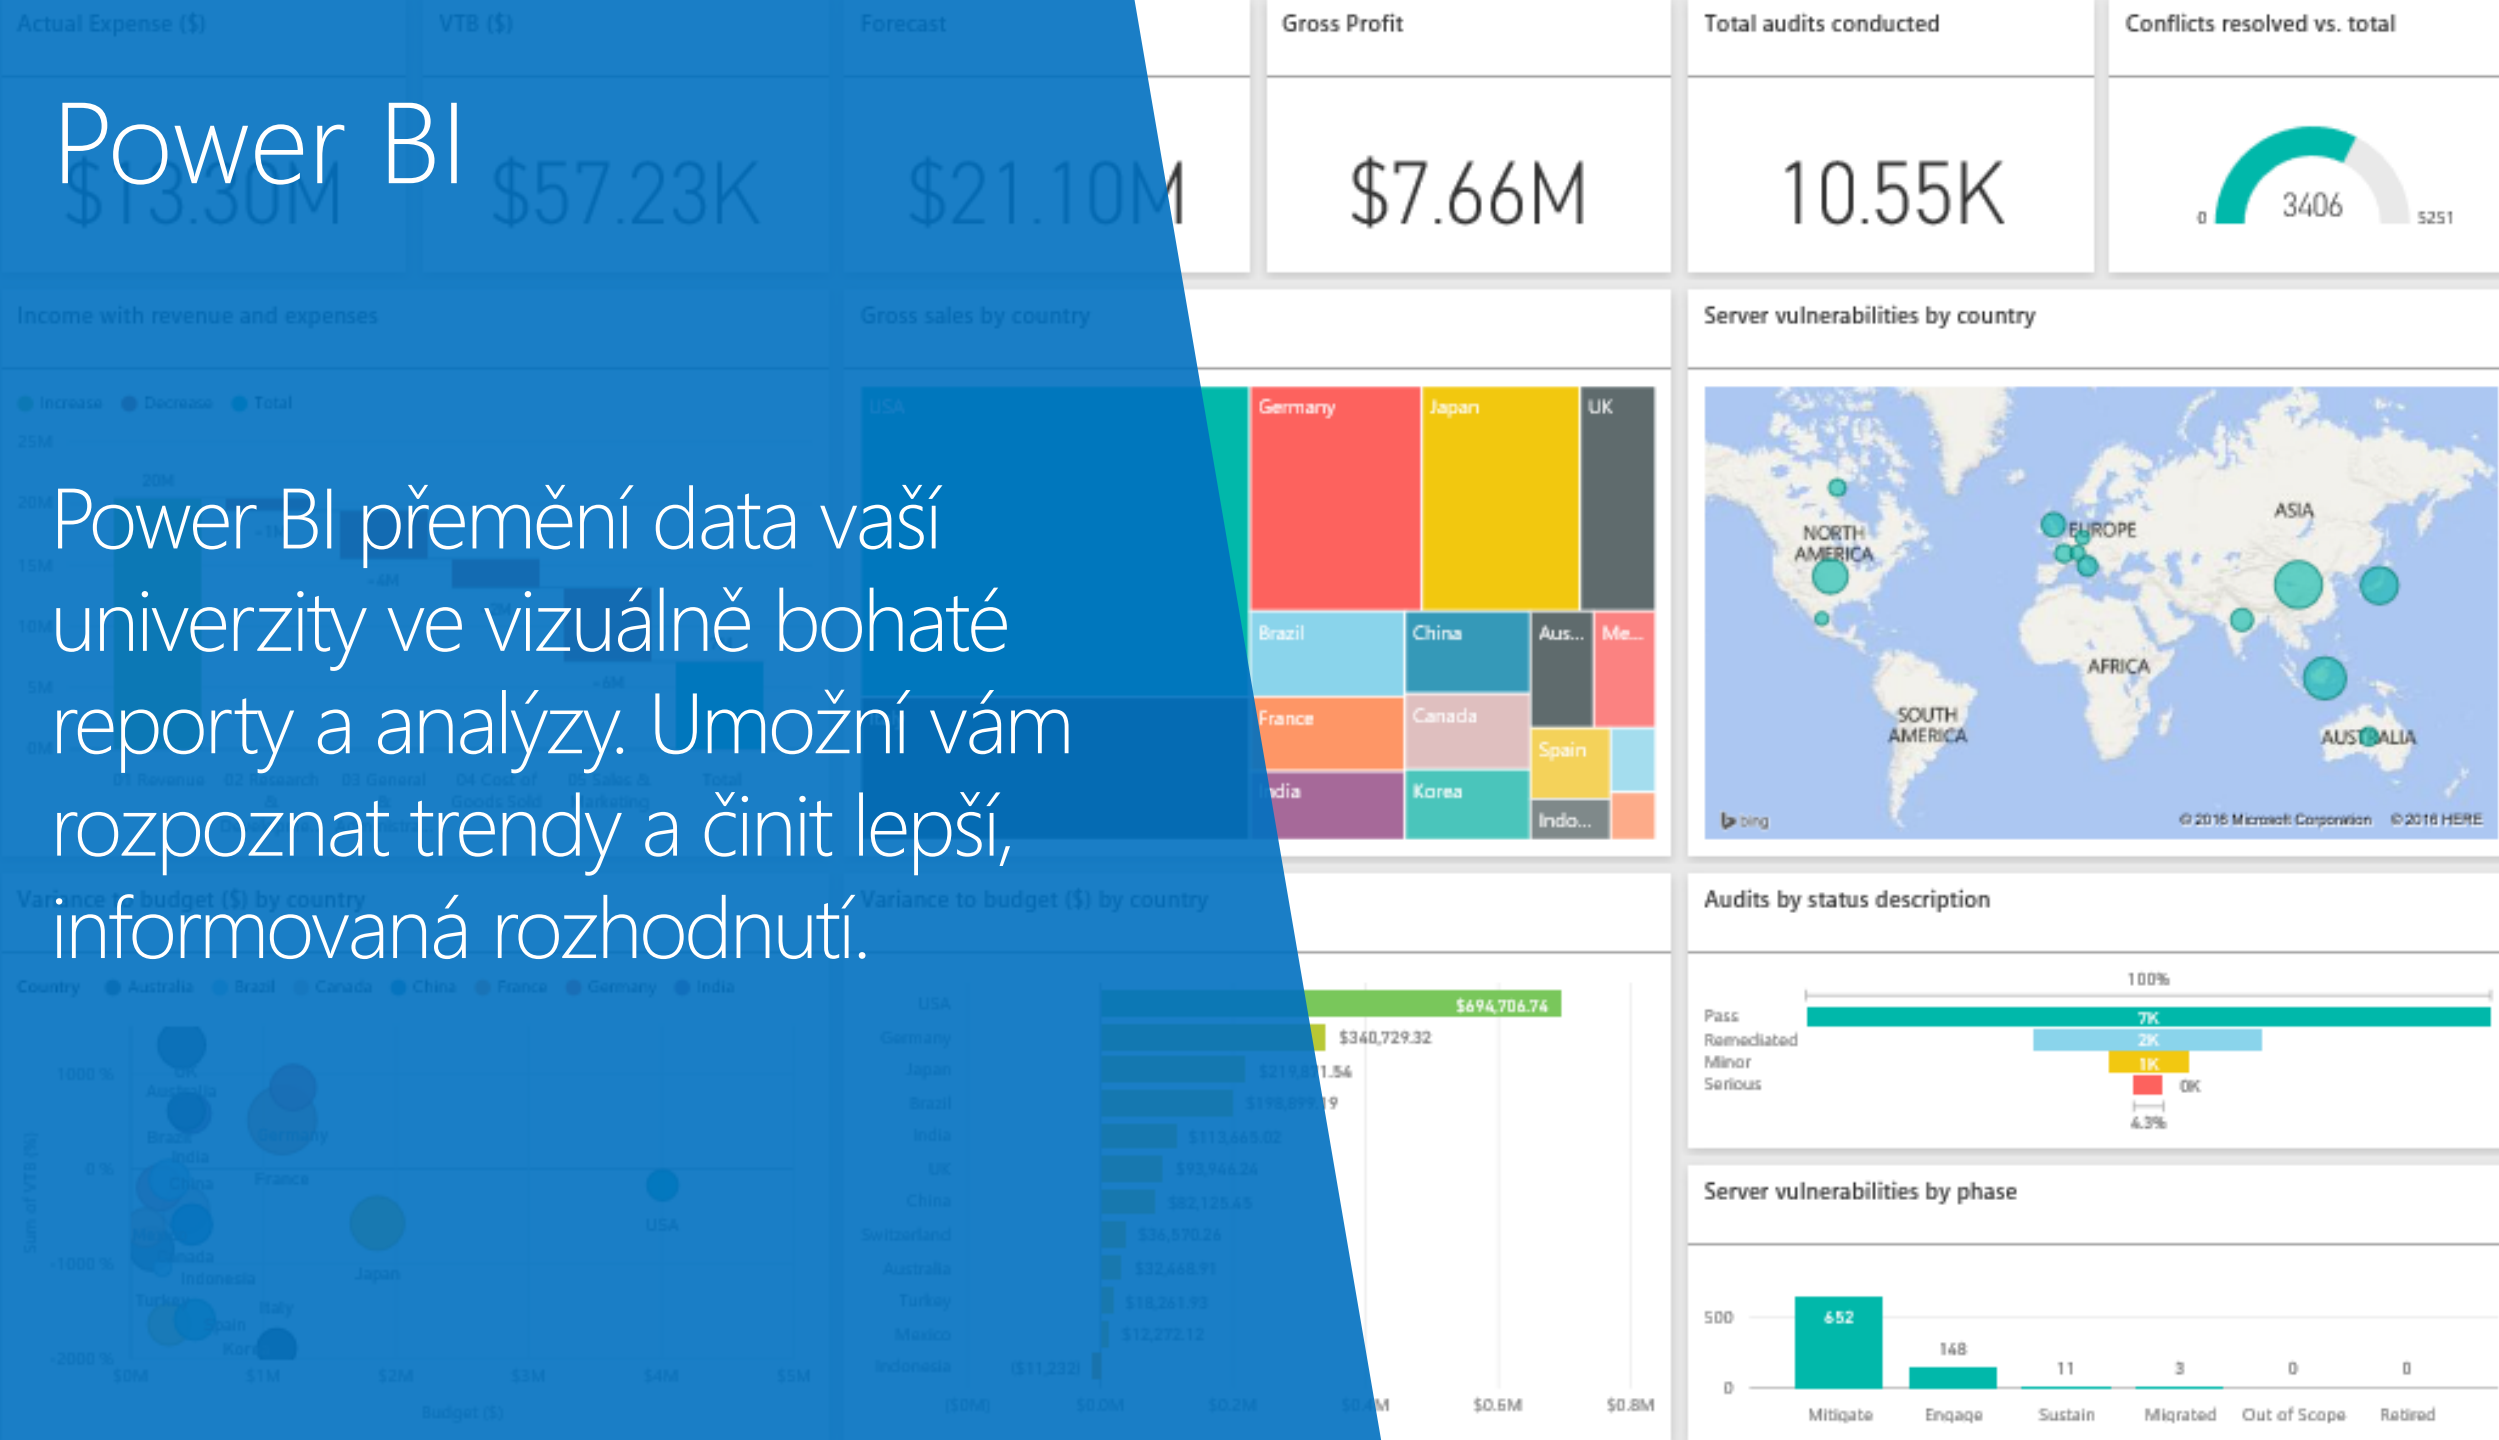

- Univerzita Pardubice
- Jihočeská univerzita

Implementuje se:

- Žilinská univerzita
- Univerzita Karlova
- Česká zemědělská univerzita

Power BI

Power BI přemění data vaší univerzity ve vizuálně bohaté reporty a analýzy. Umožní vám rozpoznat trendy a činit lepší, informovaná rozhodnutí.

Microsoft Security technology

Identity and access management

Secure access for a connected world

Threat protection

Stop threats across your entire organization

Cloud security

Comprehensive protection for multi-cloud resources, apps and data

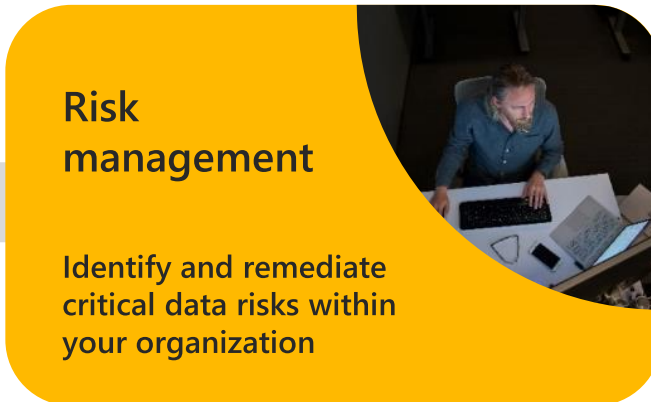

Information protection and governance

Safeguard sensitive data across clouds, apps, and endpoints

Risk management

Identify and remediate critical data risks within your organization

Compliance management

Assess compliance and respond to regulatory requirements

Identity and access management

Secure access for a connected world

Unified identity management

Seamless user experiences

Secure adaptive access

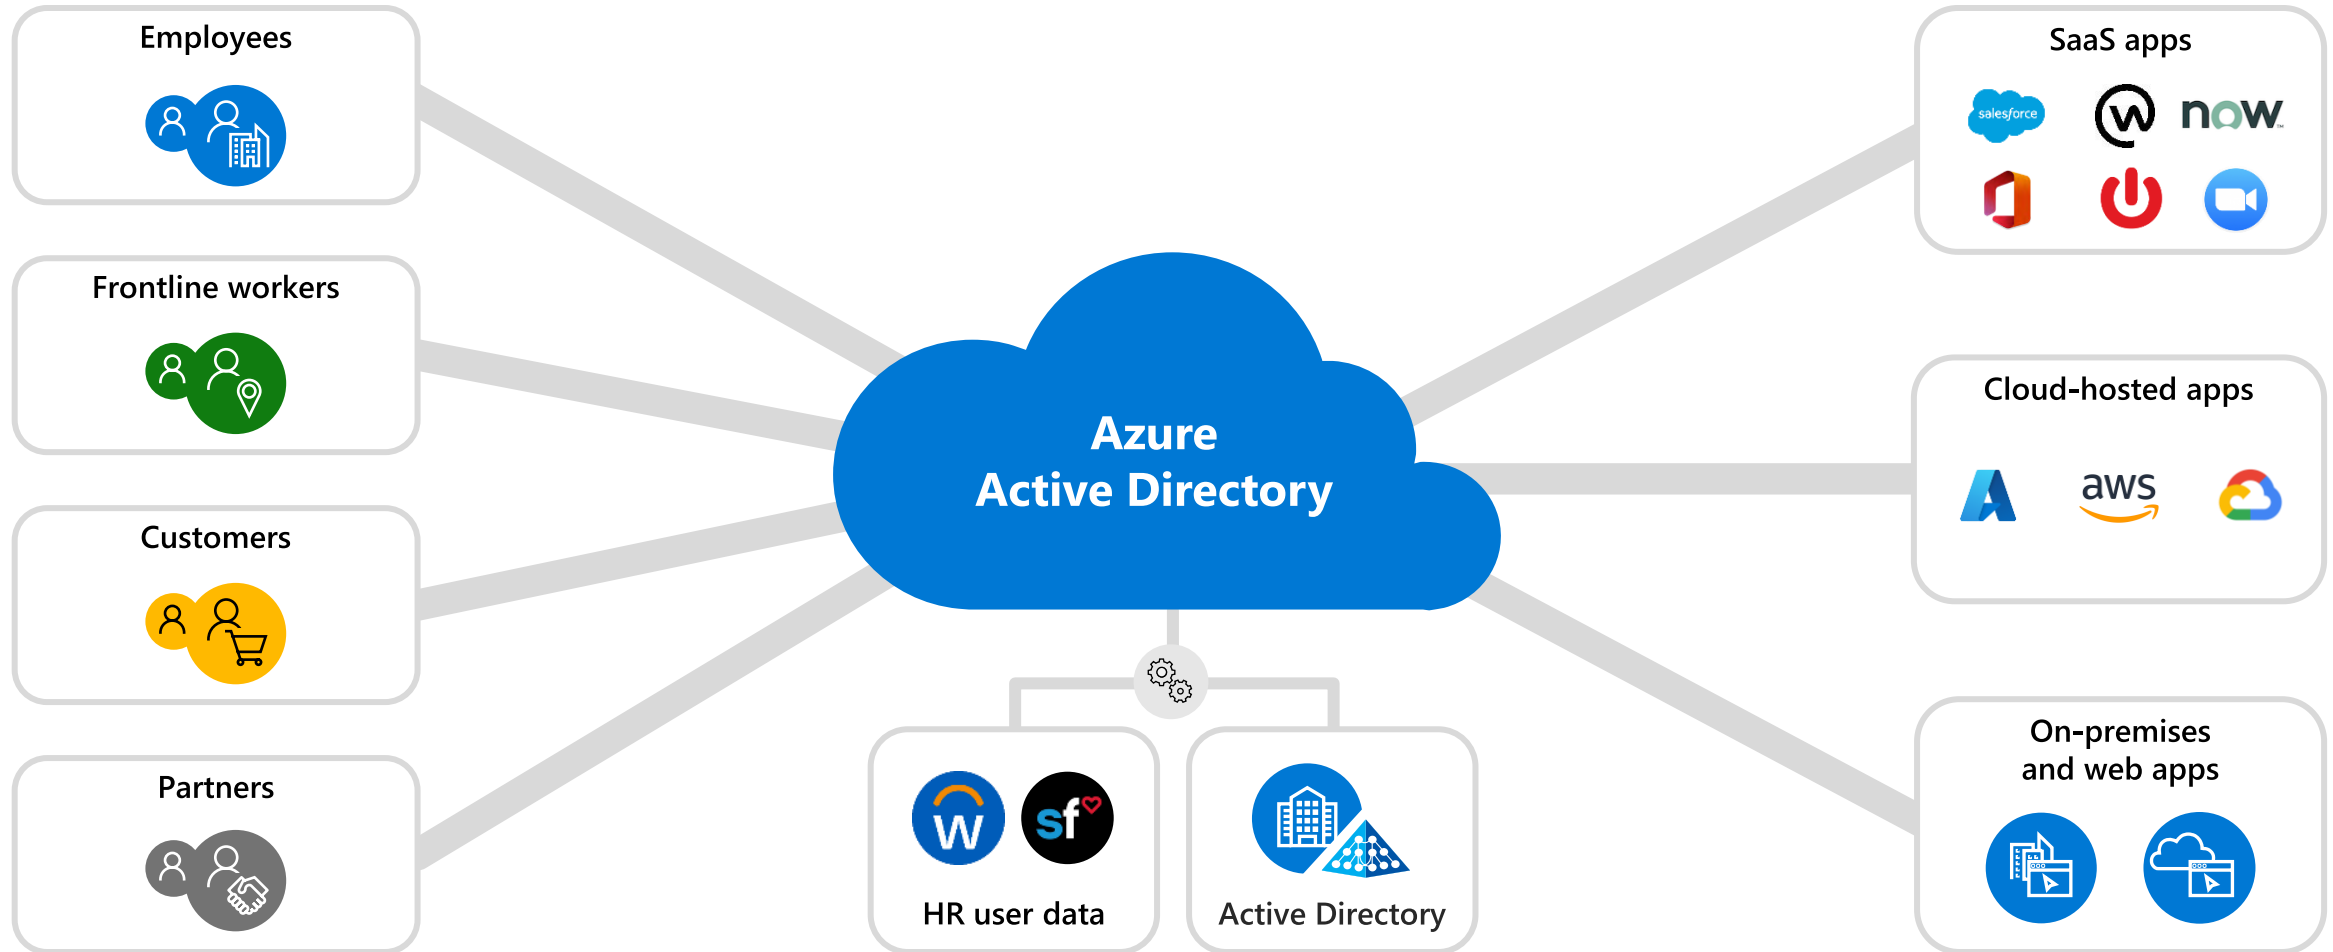

Simplified identity governance

Unified identity management

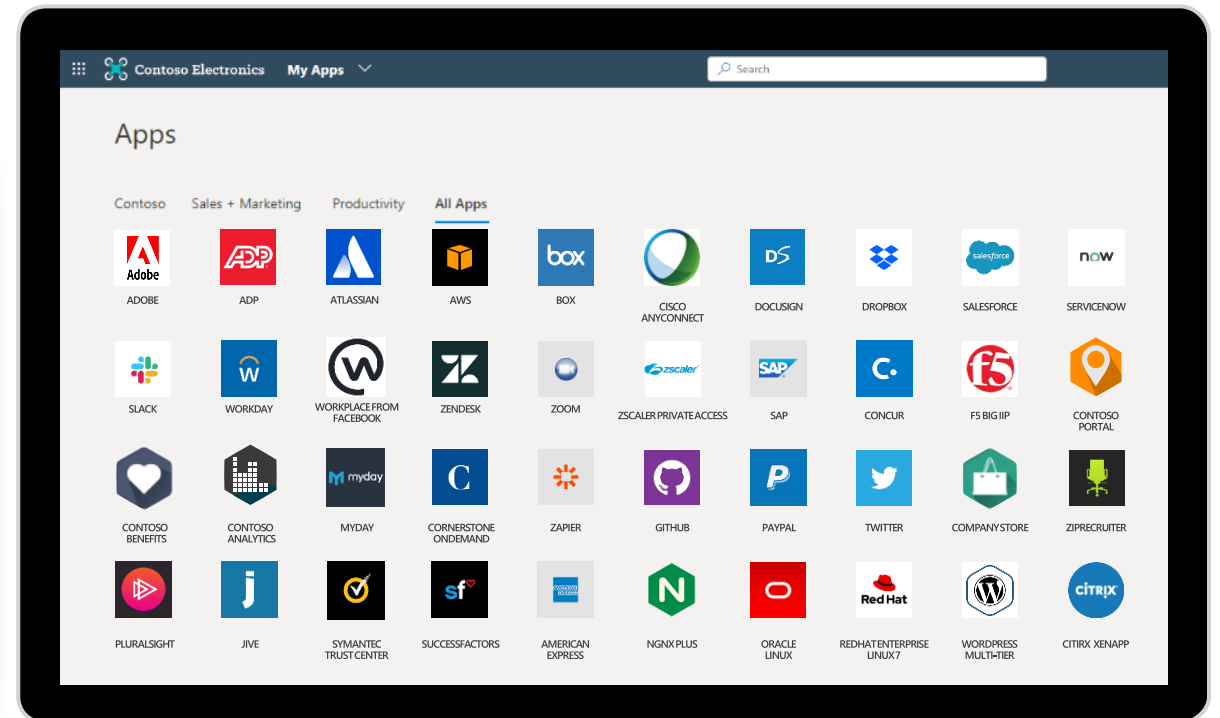

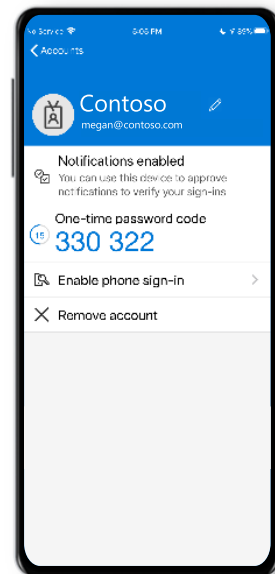

Manage all your identities and access to all your applications across your hybrid environment

Seamless user experiences

Provide an easy, fast sign-in experience to keep you and your users productive

- Passwordless authentication
- Single sign-on (SSO) for any user type
- User self-service management
- Application portal

Multi-factor authentication (MFA)

Verify user identities with strong authentication

We support a broad range of multi-factor authentication options

Including passwordless technology

Microsoft Authenticator

Windows Hello

FIDO2 security key

Biometrics

Push notification

Soft tokens OTP

Hard tokens OTP

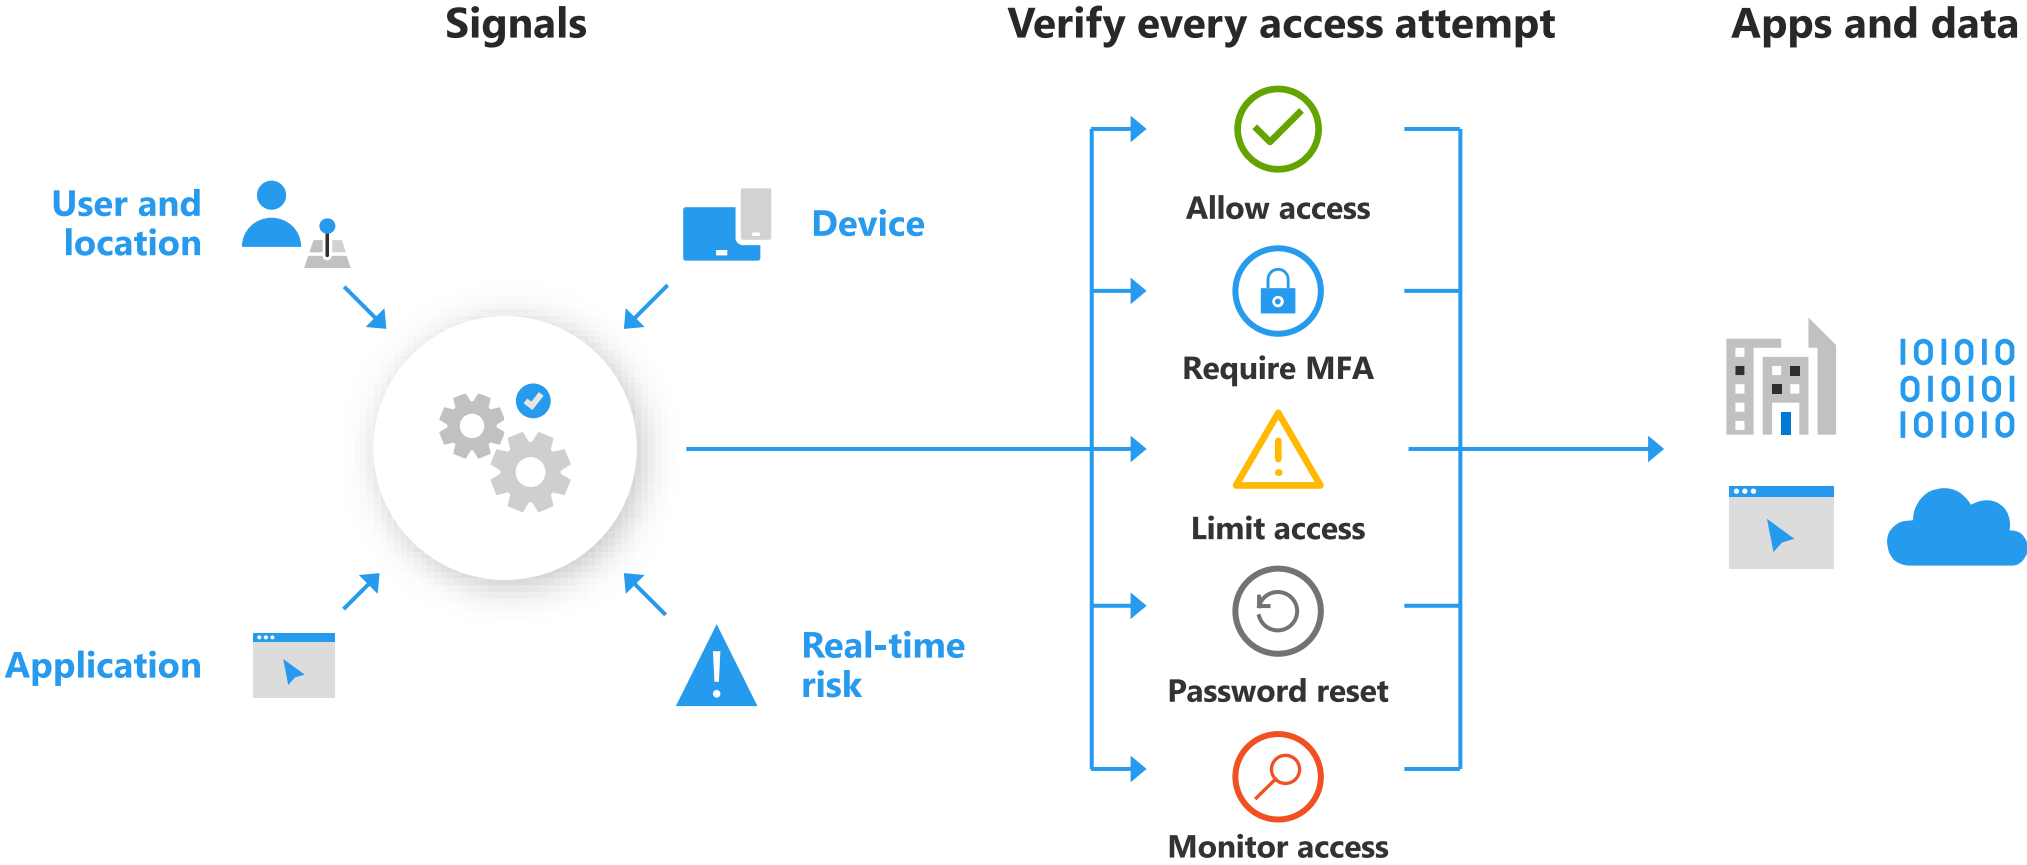

SMS, Voice

Multi-factor authentication prevents 99.9% of identity attacks

Protect identities with Conditional Access

Enable Zero Trust with strong authentication and adaptive policies

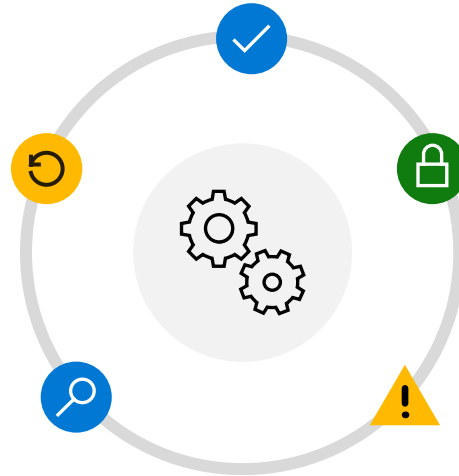

Secure adaptive access

Advance your Zero Trust strategy with strong authentication and risk-based access policies

Strong authentication

Secure access to resources with a broad range of flexible multi-factor authentication and passwordless methods

Real-time adaptive policies

Use configurable Conditional Access policies based on context and risk assessment

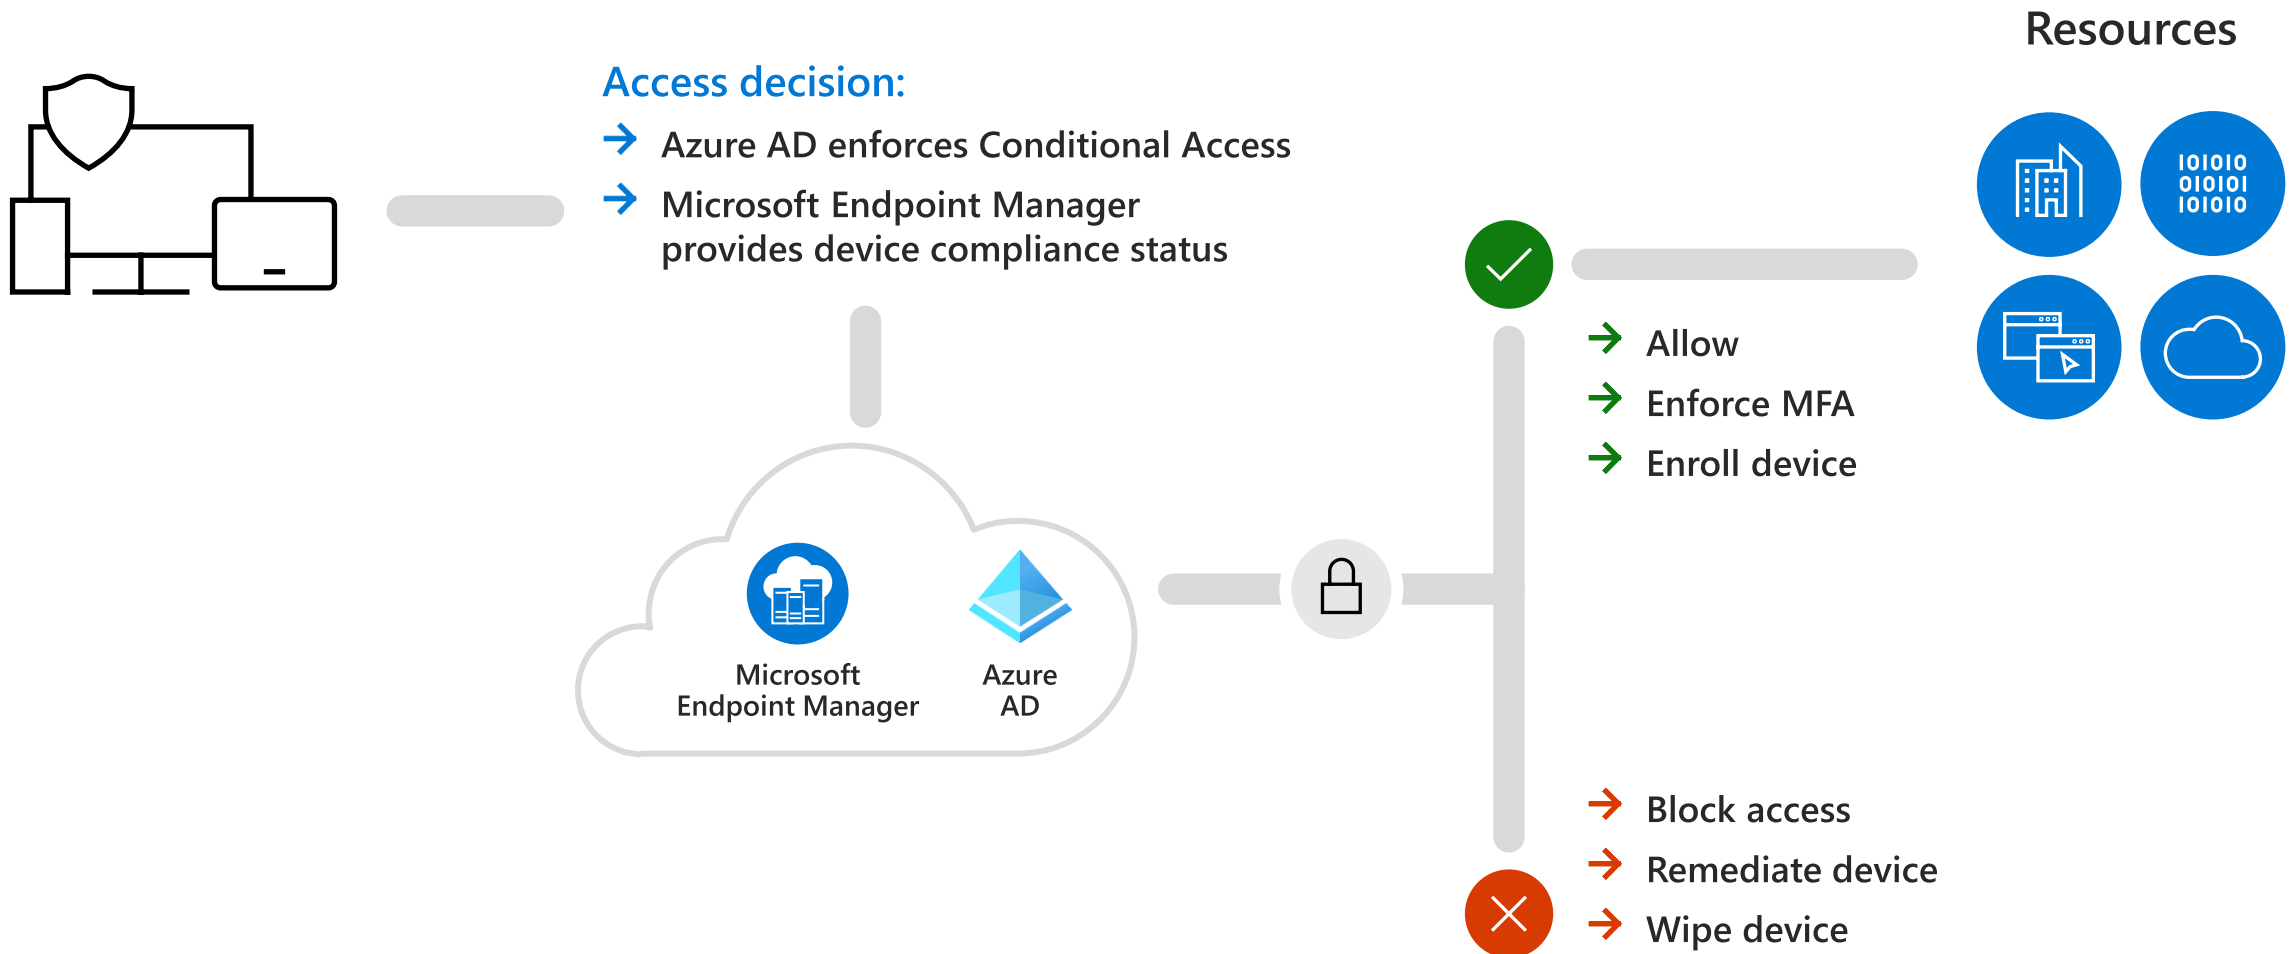

Risk detection and remediation

Intelligently detect and respond to compromised accounts using cloud-based AI

Protect against endpoint compromise

Secure access to apps and data on your devices with Conditional Access

Simplified identity governance

Efficiently automate identity governance to control access to apps and data for all users and admins

Identity lifecycle

Enable HR-driven user provisioning and automate lifecycle management

Privileged access

Mitigate risk of privileged access using time-limited access, and role-based access control

Audit report

Ensure to meet compliance obligations with audit reporting capabilities

Threat protection

Stop threats across your
entire organization

Secure all clouds, all platforms

Get leading integrated protection

Deliver rapid, intelligent response

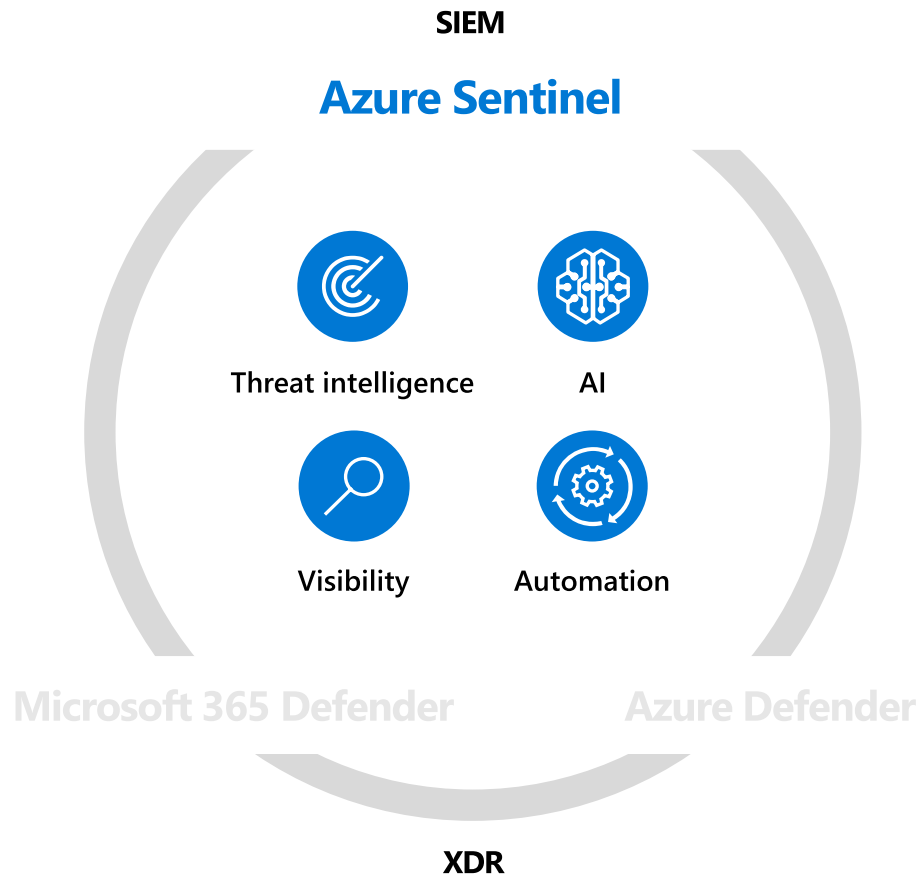

Stay ahead of attackers with a unified SecOps experience

Gain insights across your entire enterprise

Visualize and investigate the kill chain with best-in-class, cloud-native SIEM

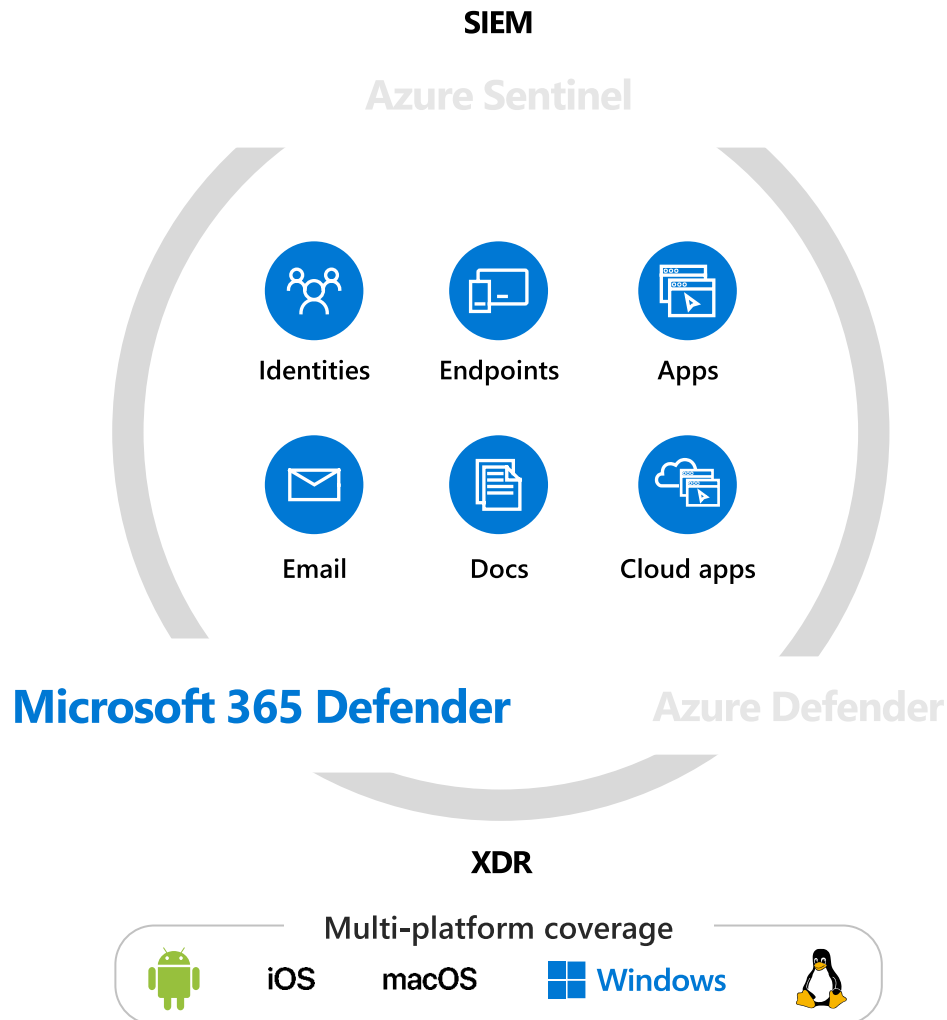

- Collect all your security data at cloud scale and integrate with your existing tools
- Leverage AI to detect emergent threats, reducing false positives by 79%¹
- Respond rapidly with built-in orchestration and automation

¹. The Total Economic Impact™ of Microsoft Azure Sentinel from Forrester Consulting

Detect and respond across end-user environments

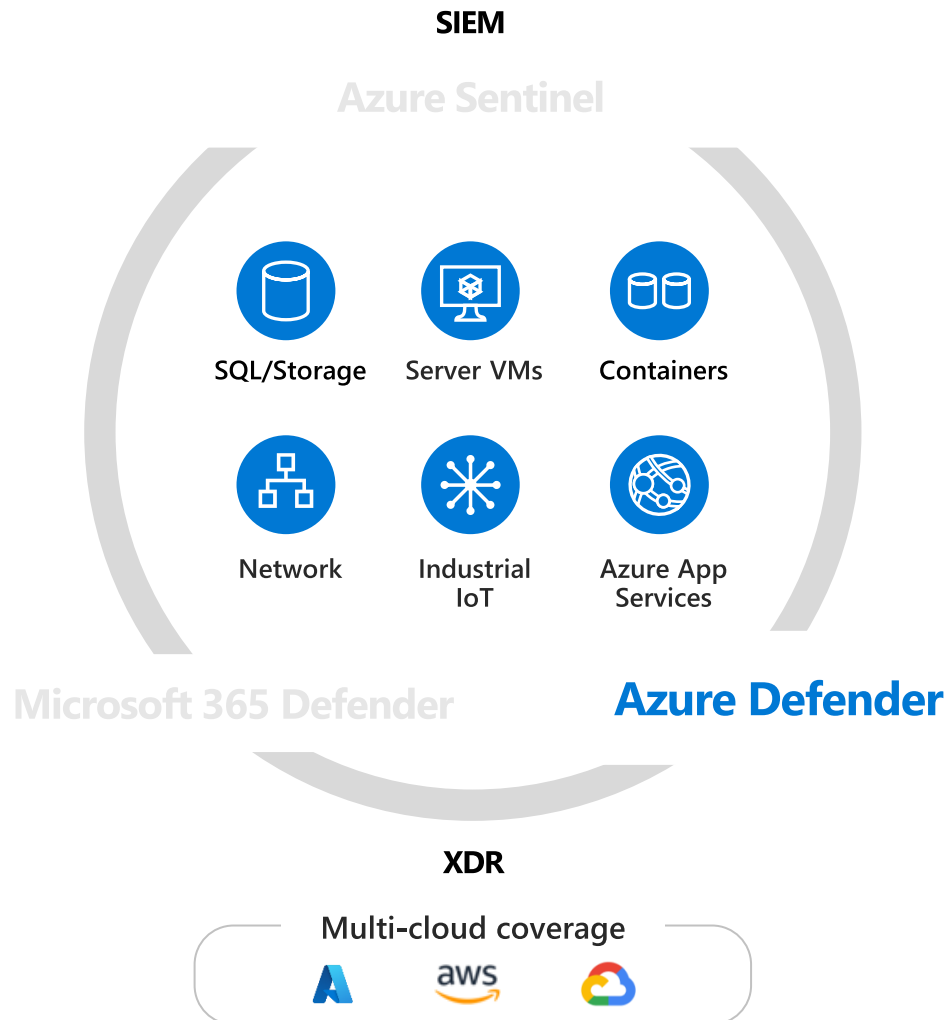

Prevent and detect threats, hunt for attacks, and coordinate response across your assets

- Stop attacks before they occur with out-of-the-box, best-in-class protection capabilities
- Detect and automate across siloes, integrating threat data for rapid response
- Hunt across all your Microsoft 365 data and apply your unique expertise
- View alerts and remediate across your Microsoft 365 environment in a single dashboard

Intelligent detection and response for Azure and hybrid workloads

Use industry-leading threat intelligence to gain deep insights into your multi-cloud workloads

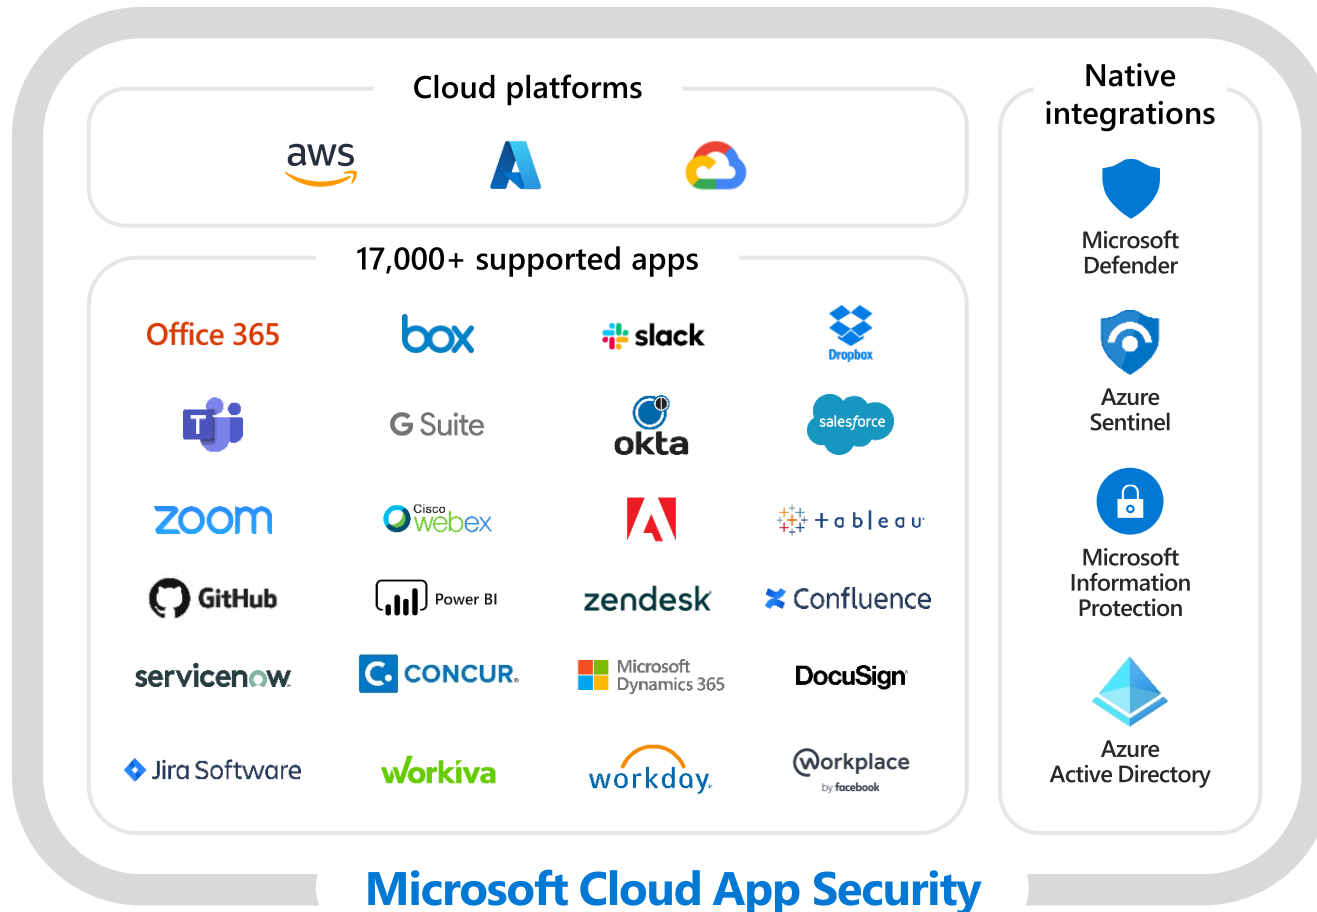

- Protect data services, cloud-native services, Windows and Linux servers, and IoT from threats
- Extend protection to on-premises and multi-cloud for virtual machines, Kubernetes, and SQL databases using Azure Arc
- Reduce the time to remediate threats by 50%¹

¹ The Total Economic Impact™ of Azure Security Center from Forrester Consulting

Control access to cloud resources, apps, and data

Manage and govern the use of cloud apps across your organization

- Discover and control the use of cloud apps across your environment
- Protect sensitive information with real-time data access and usage controls
- Identify and remediate cloud-native attacks

 Spend **80% less time** monitoring, assessing, and governing cloud application risks¹

¹: The Total Economic Impact™ of Microsoft Cloud App Security from Forrester Consulting

Information protection and governance

Safeguard sensitive data across clouds, apps, and endpoints

Know and protect sensitive data wherever it is

Prevent accidental or inappropriate sharing of sensitive data

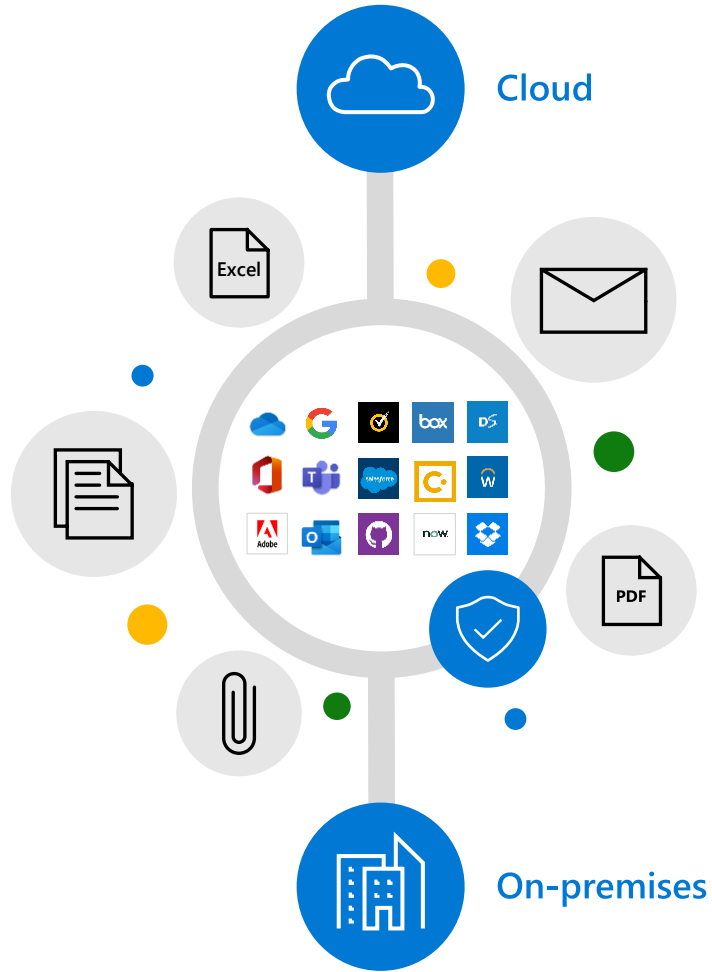

Classify and govern data at scale

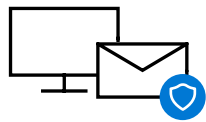

Know and protect sensitive data wherever it is

An intelligent, built-in, extensible solution for data protection

- Discover and classify data at scale using automation and Machine Learning
- Built-in labeling and protection experience
- Platform extends the protection experience
- Encryption built into Microsoft 365 and Azure: at rest, in transit, and in use

Prevent accidental or inappropriate sharing of sensitive data

Endpoint

Cloud

Apps

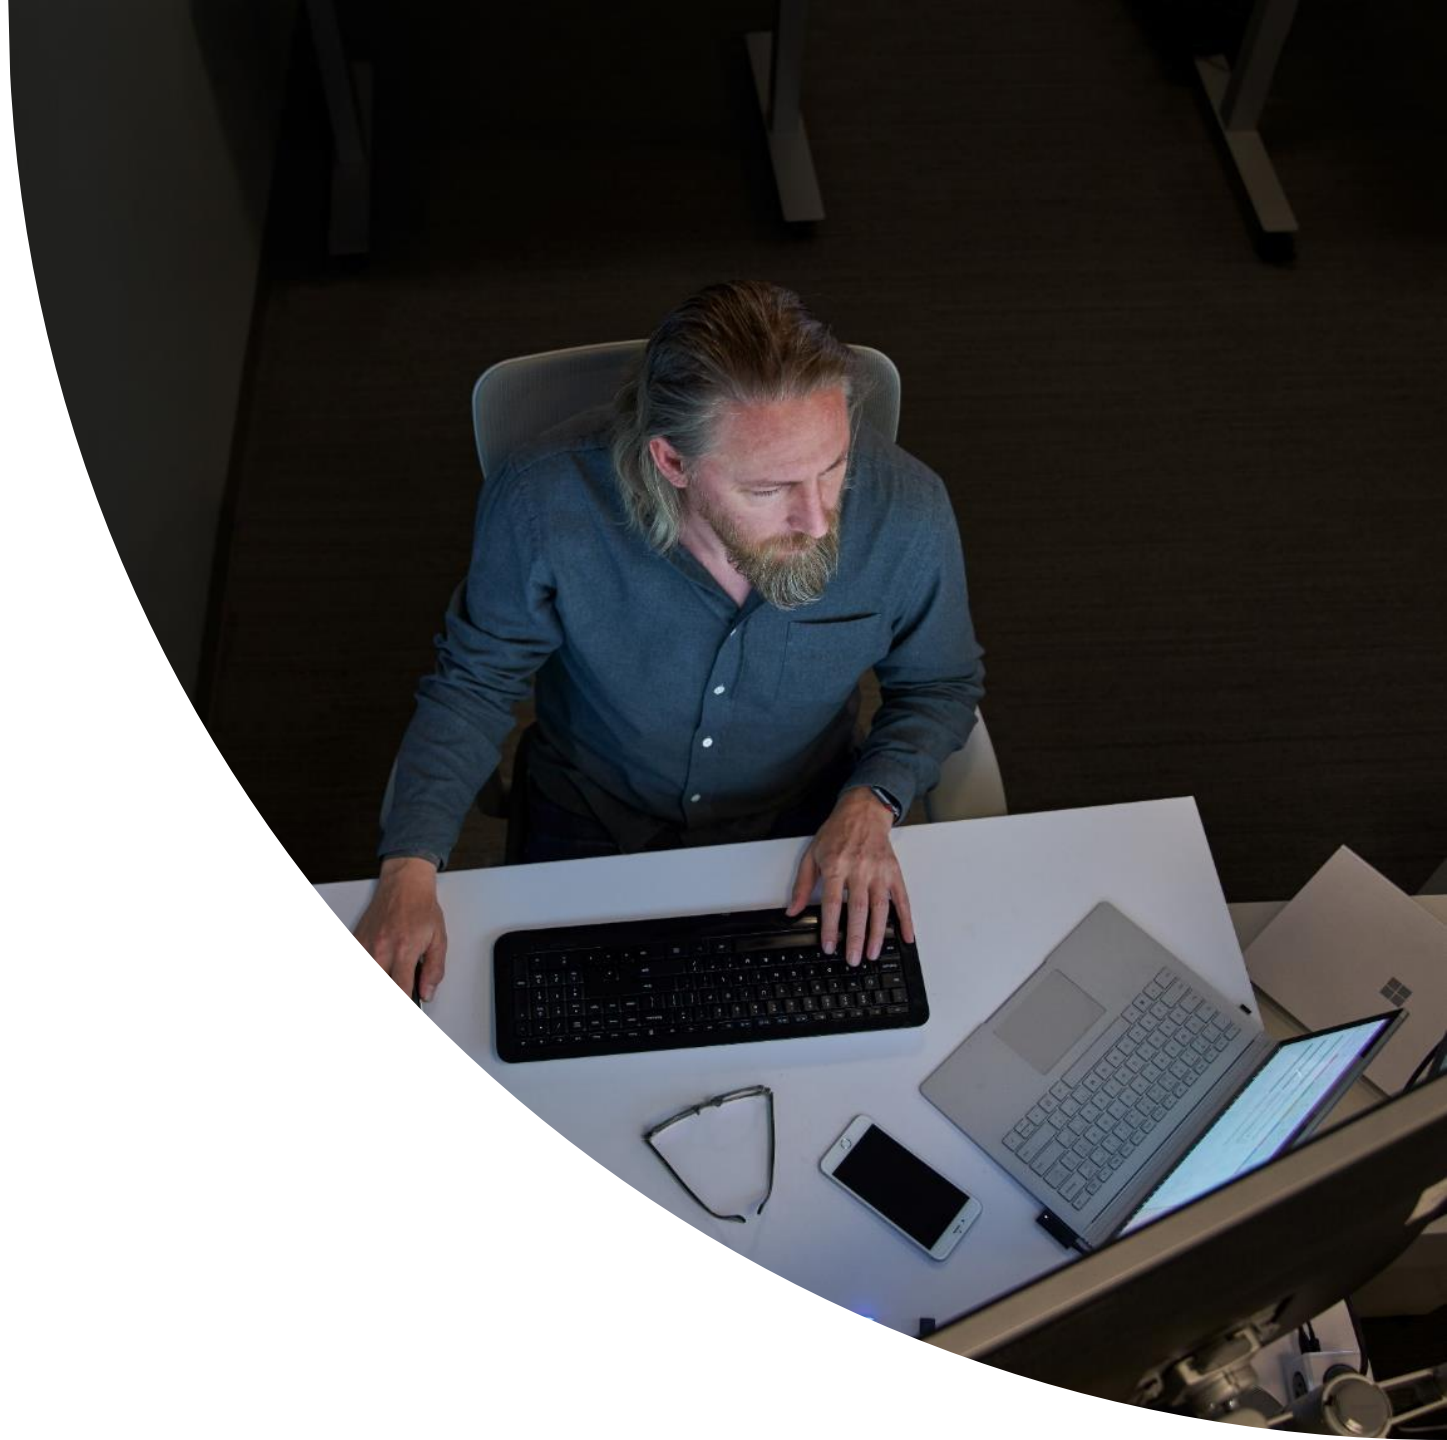

101010101010
010101010101
101010101010

- Automatically enforce compliance with regulations and internal policies across cloud and on-premises
- Extend DLP policy to both Microsoft and non-Microsoft endpoints, file shares, user apps, browsers, and services
- Apply flexible policy administration to balance user productivity
